

SEASIDE CLUB PRESENTS

LEARN2EARN APP

We want our community to be empowering for people and one good way for such empowerment is knowledge. For this reason we are currently developing a learning app with a Learn2Earn system onboard. Only Apex Humanity NFT, Membership NFT and Crypto Hunters NFT holders will get access to the app.

We want to encourage knowledge sharing among members. For this reason we will be glad to feature community specialists and writers in the live-feed newspaper. All talents and experts will also have a chance to join the Seaside team in future projects.

In short – the Learn2Earn app will feature:

- **Industry news, Podcasts and Learning materials form business, crypto, NFT and lifestyle areas!**
- **Network with other holders and with a project team in a special General Chat!**
- **Complete daily quizzes earning app rating and Learn Tokens!**
- **Attain a great prize by winning the monthly Live Quiz!**
- **Spend Learn Tokens for blue chip NFTs via Auction!**
- **Spend Learn Tokens for tickets to real life events!**
- **Propose your business project to be funded by the Club!**
- **Apply to become a writer and earn from featuring your own learning materials in the app!**

The app will contain a live-feed newspaper with specialized articles and overviews from various business and technological areas. We want to create a special hub of up-to-date know-how articles and valid industry news without politics or religion.

All users will be able compete in a monthly knowledge contest in the app. There will be daily multiple choice quizzes formed from all of the learning materials available. Completing daily quizzes will give a user a boost in the leaderboard and will give him special Learn Tokens. The 5 best people from the ladderboard of each month will compete in a live show where the winner will get a 5-figure cash prize.

Apart from these points, we also included several other features to use the Learn Token for real tangible rewards. For instance – we introduce the Auction, the Networking Chat and rewards for active app users. We integrate a rewards system for community members who are actively involved in the project's life. By actively communicating or sharing content users will get Learn Token rewards.

A special submission form will be open for all users where they can outline the business project they would like to venture. The submission will cost a certain amount of Learn Tokens to file and there will be only 1 submission available at a time per one user.

These business ideas will be reviewed by the founder and business analytics team. After the review – the list of top 5 projects will be open for community voting and the winner project will be funded by the Club and further integrated in our ecosystem.

The Auction function will allow users to buy NFTs from top collections using the Learn Tokens earned from daily quizzes. Seaside Club owns a range of high tier NFTs that users of the app will have an ability to bid on the auction with the Learn Token and the highest bidder will get the NFT transferred to his wallet.

The Networking Chat is proposed to bring the Seaside Club community together. In the app NFT holders will be able to network with each other, ask direct questions to the founder of Seaside Club or the Seaside team, get their ideas seen and heard. In future chat functionality will gradually expand to the level of a social network that is exclusively available only to Seaside Club members and NFT holders.

Each app user will be able to propose his own articles to be posted in the app. A special submission form will be open for community members who would like to apply for writing their own learning materials. Those who successfully pass the screening – will be rewarded for each article they write.

We see our app as the central hub for all Seaside Club community operations. With the app you will be able to propose your own business project to be funded by the Club. You can also vote to select the best project among those that were approved for funding.

Using the tokens you earned from quizzes you can get access to the special feed of market analytics and trading analysis.

Moreover - you can use the Learn Tokens to get yourself a ticket to the next event you would like to attend - conferences, business networking meetings, NFT exhibitions and other options will be available for all!

The app Beta release will happen after the Apex Humanity NFT minting - expected in late 2022. The app will be further developed, releasing feature by feature over time.

Stay tuned - you are still early!
